

The smile you want.

Brought to life.

CELEBRACE SMILE CASEBOOK

AI-driven planning.

3D-printed precision.

Fully custom braces.

Every smile is different.

Your braces can be too.

- **PLANNED** around your teeth and goals
- **CUSTOM-DESIGNED** to follow your digital treatment plan
- **PERSONALIZED** for your individual smile

**Custom brackets, digitally planned for
*your individual smile.***

Most braces are adjusted along the way.

Celebrace starts with the result in mind.

- 1 PLAN YOUR SMILE
- 2 DESIGN YOUR BRACES
- 3 GUIDE TREATMENT

*Your precision treatment plan guides the braces **made specifically for you.***

WHY CUSTOM MATTERS

- 01 Personalized** Designed around your individual smile.
- 02 Precise** Your braces follow a plan created from the start.
- 03 Efficient** A streamlined approach to treatment.
- 04 Fewer surprises** Planning helps guide progress along the way.

Ask if Celebrace is right for your smile

FIND A SMILE LIKE YOURS

What would you most like to change about your smile?

Click on your concern:

— CROWDING

— DEEP BITE

— SPACES

— OPEN BITE

— OVERJET

— CROSSBITE

BEFORE

AFTER

Ask what is possible for your smile.

Crowding

When teeth do not have enough room to line up comfortably.

We start by planning where each tooth should finish, then create your braces around that plan.

Crowding | Patient Example 1

BEFORE

24
Weeks

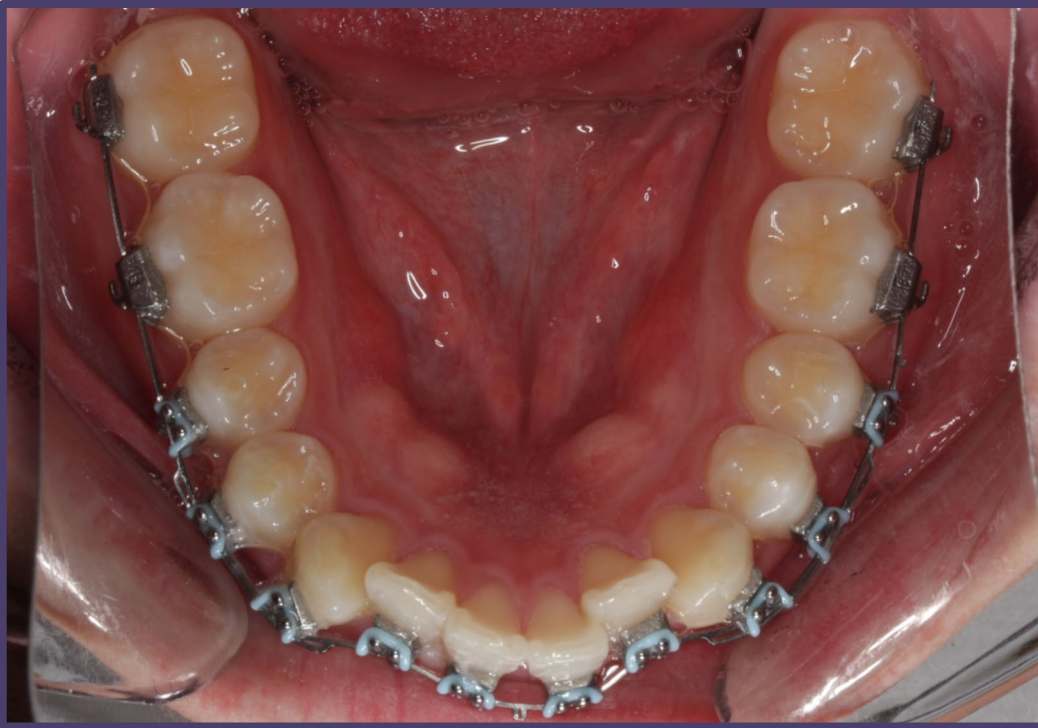

AFTER

Creating room for a more aligned smile.

Crowding | Patient Example 2

BEFORE

5
Weeks

AFTER

Creating room for a more aligned smile.

Spaces

When gaps between teeth are part of the smile you want to change.

We close space with the final smile in mind.

Spaces | Patient Example 1

BEFORE

3
Weeks

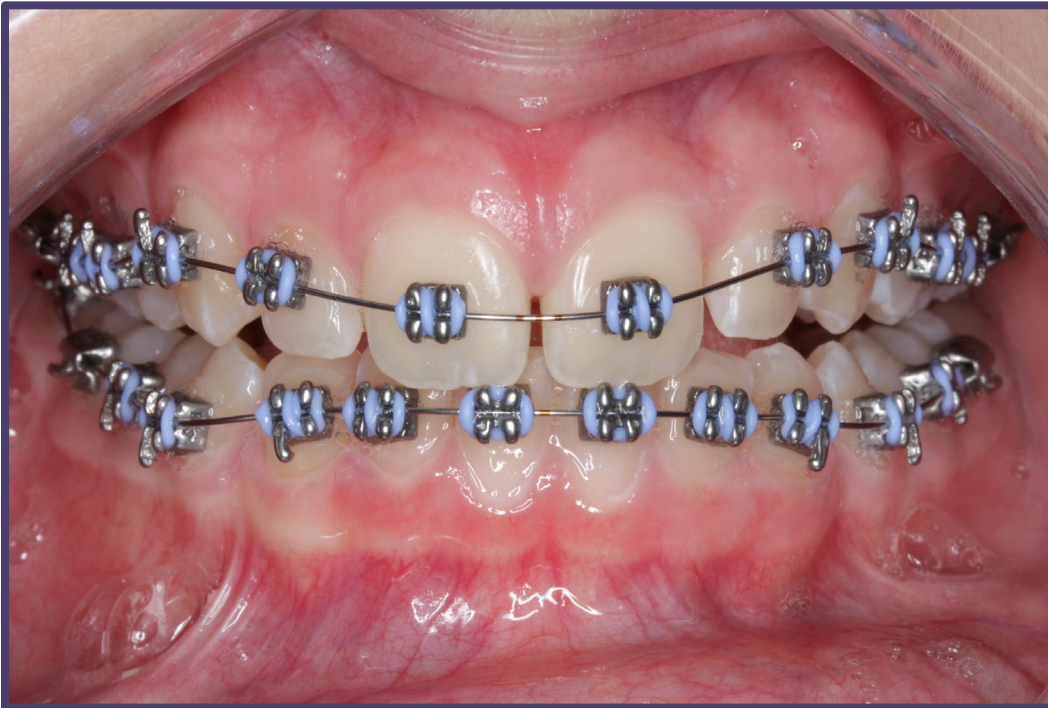

AFTER

Bringing teeth together with the final smile in mind.

Spaces | Patient Example 2

BEFORE

1.5
Month

AFTER

Bringing teeth together with the final smile in mind.

Overjet

Teeth that sit forward

When the upper front teeth sit farther forward than desired.

We plan alignment and bite relationship together.

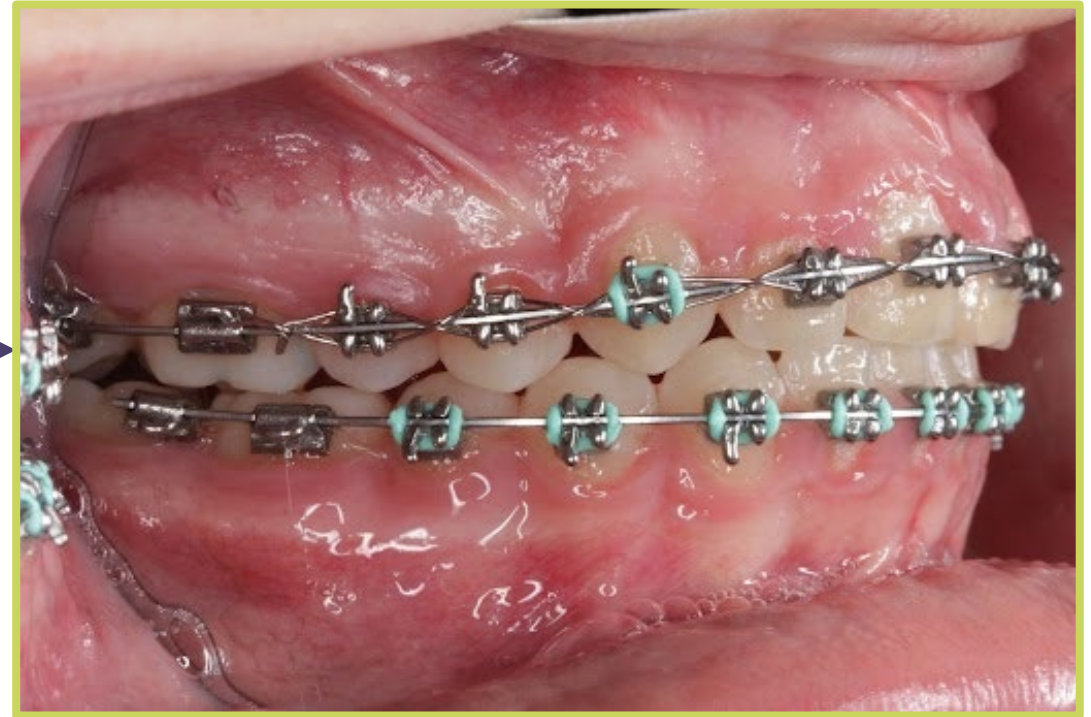

Overjet | Patient Example 1

BEFORE

24
Weeks

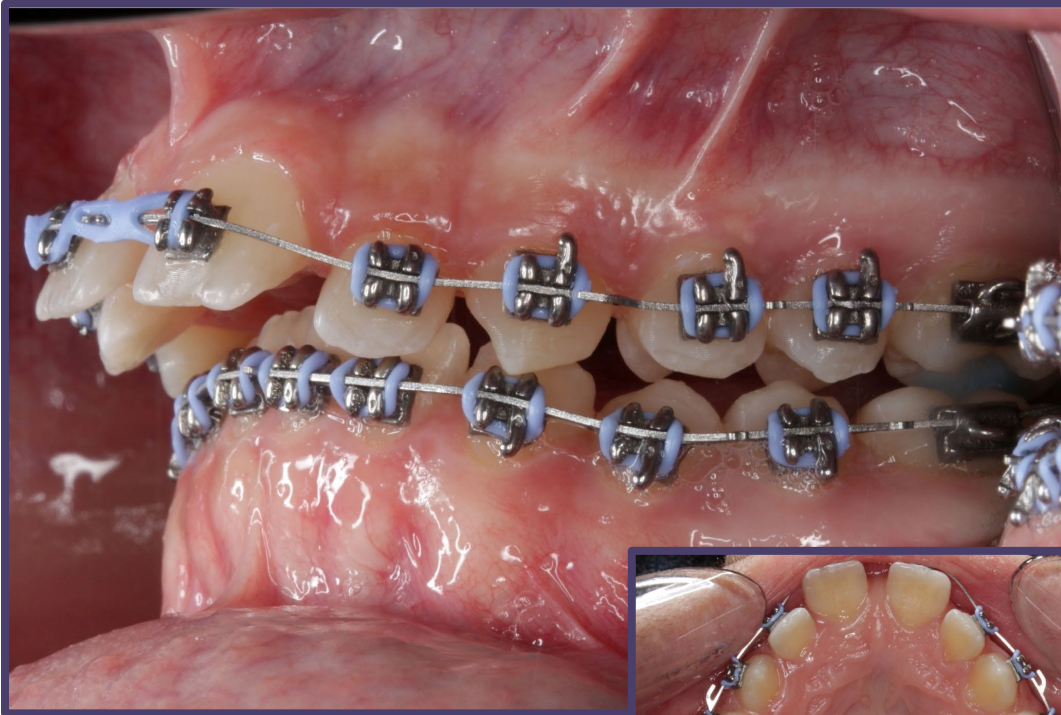

AFTER

Planning alignment and the relationship between upper and lower teeth.

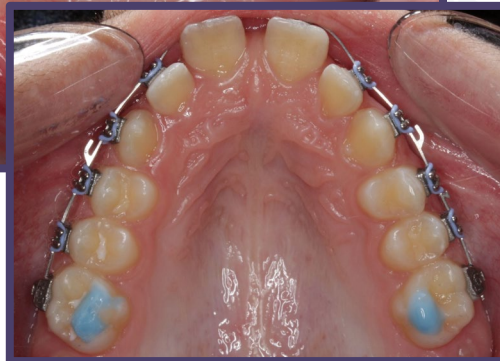

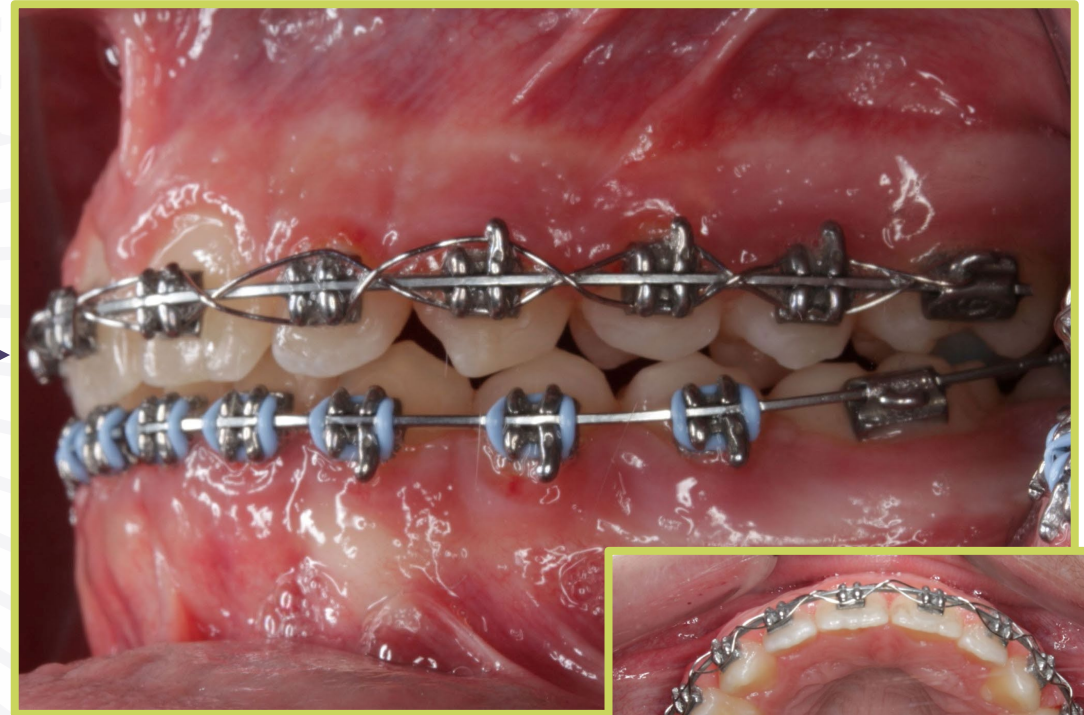

Overjet | Patient Example 2

BEFORE

16
Weeks

AFTER

Planning alignment and the relationship between upper and lower teeth.

Deep Bite

When the upper teeth cover more of the lower teeth than we want.

We plan how the teeth align and come together.

Deep Bite | Patient Example 1

BEFORE

AFTER

Treatment Time: 11 months

Planning how the teeth align and come together.

Deep Bite | Patient Example 2

BEFORE

AFTER

Treatment Time: 10 months

Planning how the teeth align and come together.

Open Bite

When some upper and lower teeth do not meet when you bite.

We guide teeth toward better contact and balance.

Open Bite | Patient Example 1

BEFORE – Front

5
Months

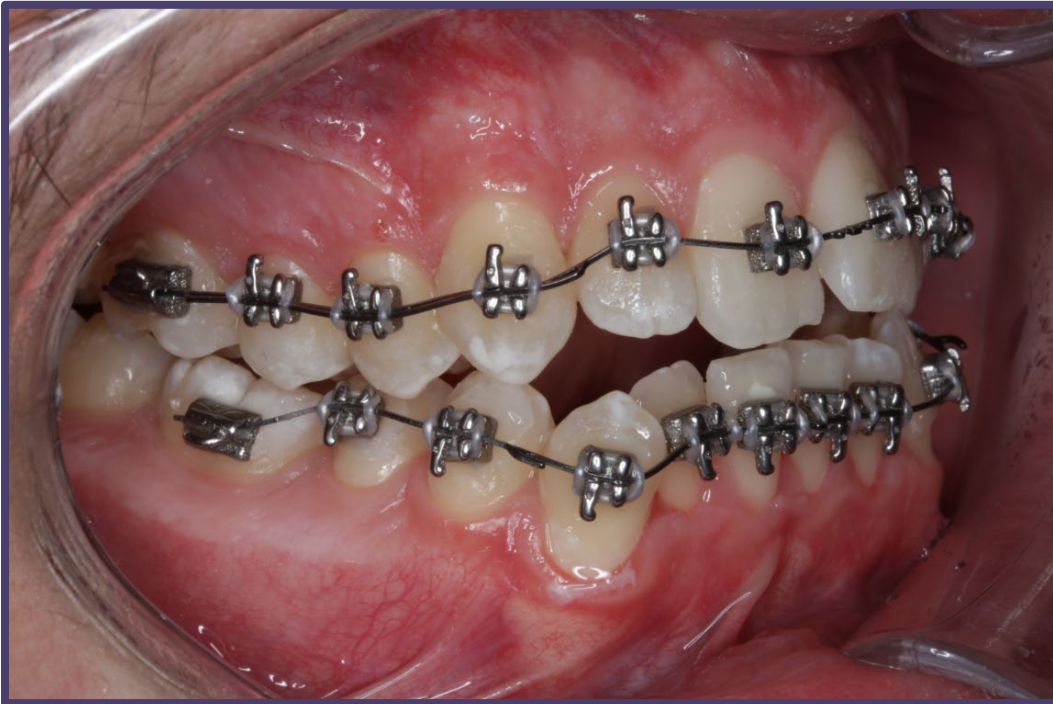

AFTER – Front

Guiding teeth toward better contact and alignment.

Open Bite | Patient Example 1

BEFORE – Side

5
Months

AFTER – Side

Guiding teeth toward better contact and alignment.

Crossbite

When some upper and lower teeth meet in the opposite relationship from where they should.

**We plan a better relationship
between upper and lower teeth.**

Crossbite | Patient Example 1

BEFORE

AFTER

Treatment Time: 1 year, 8 months

Planning a better relationship between the upper and lower teeth.

LET'S TALK ABOUT YOUR SMILE

What matters most to you?
